

Examples of Mismanaged Chemicals

- In poor condition;
- Expired;
- Overabundant (i.e., more of a chemical is purchased and stored than is needed or used);
- Hazardous or potentially hazardous;
- Unknown;
- Not clearly labeled with the chemical name, date, and storage and handling requirements;
- Stored alphabetically or near incompatible chemicals;
- Stored in inappropriate containers, such as buckets or reused food containers; and
- Stored on deteriorating, unstable, or inappropriate shelving.

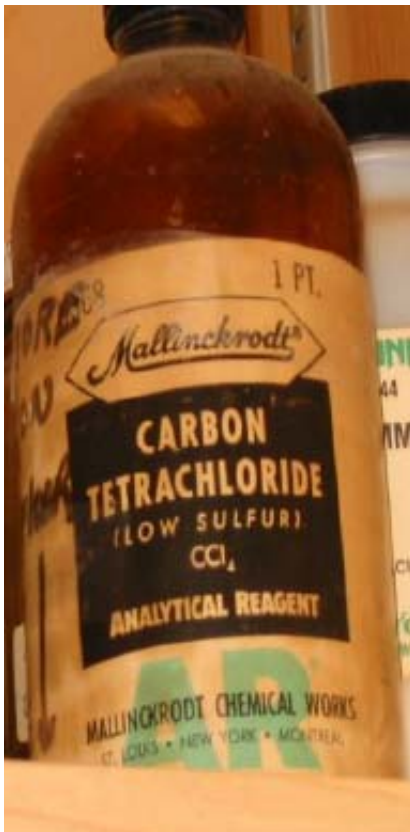

Poor Condition & Expired

Overabundant

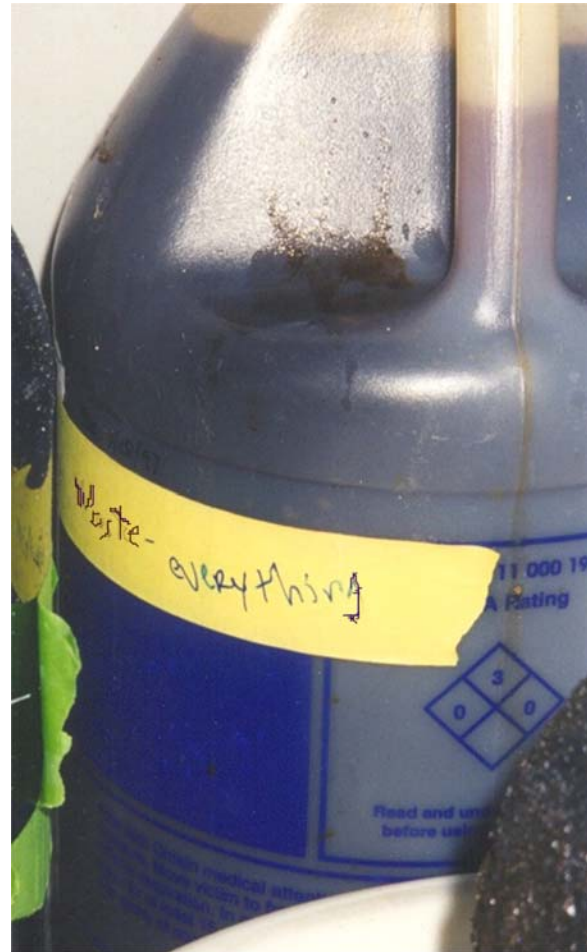

Hazardous & Potentially Hazardous

(high flammability material)

Unknown and not clearly labeled with the chemical name, date, and storage and handling requirements

Stored Near Incompatible Chemicals

stored alphabetically

Inappropriate Storage Containers

Stored on deteriorating, unstable, or inappropriate shelving

Bottles as structural support to hold up the shelf
